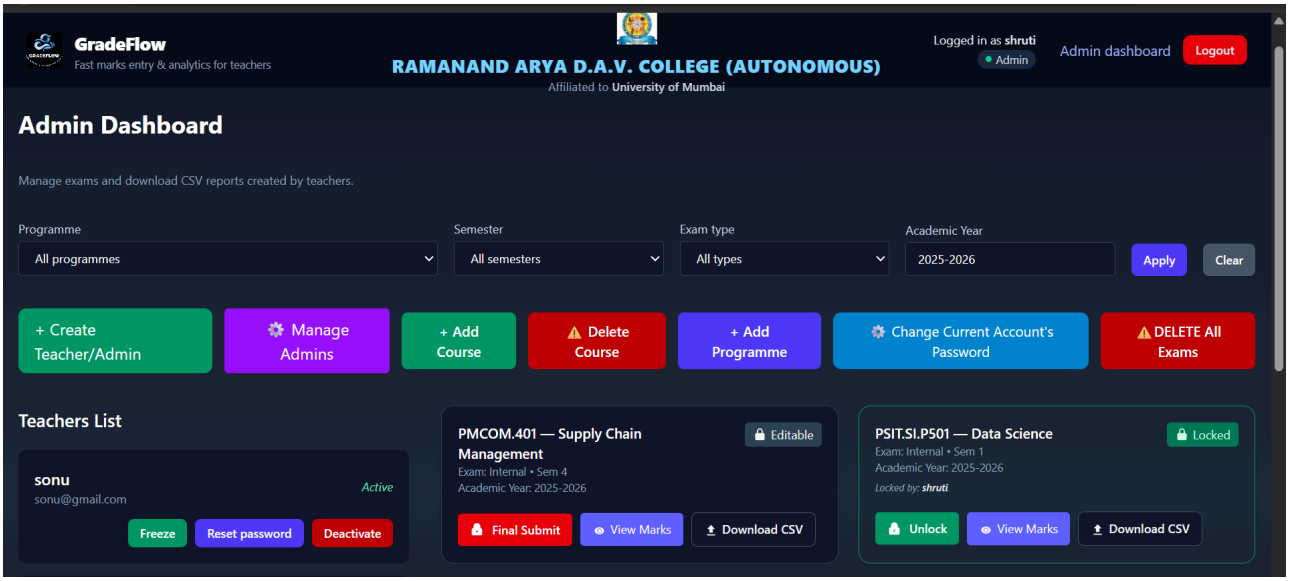
📘 GradeFlow – Administrator Instruction Guide

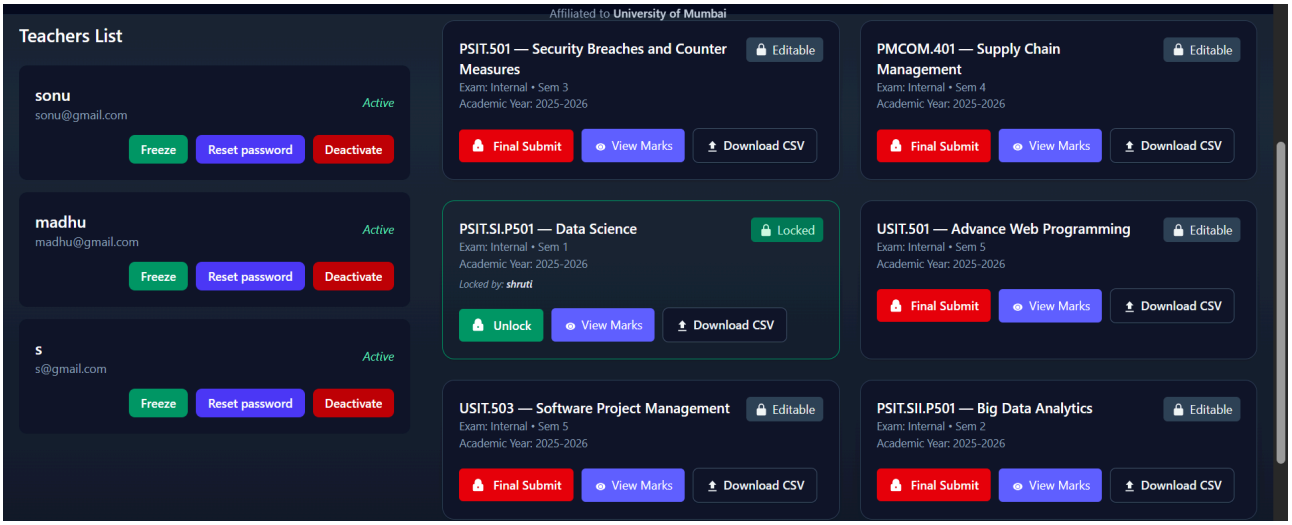
🔹 1. Overview of Admin Module

The Admin module of GradeFlow is used by the examination cell to manage:

- Teacher and admin accounts
- Programmes and courses
- Exams and reports
- Finalized marks and system control actions

It provides centralized authority over grading workflows and academic data.





📘 EXAM FILTERING & SEARCH

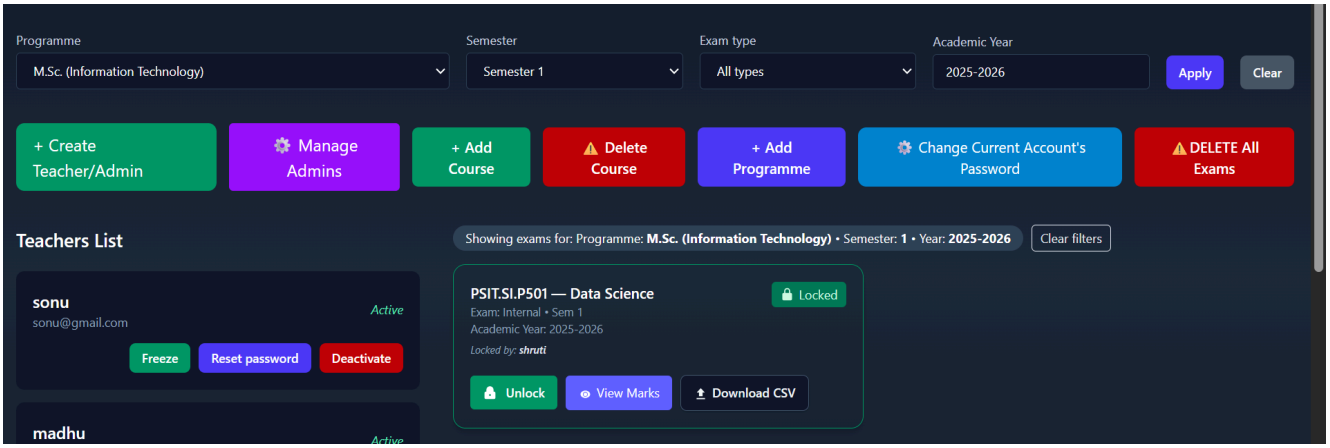
🔹 2. Filters Section (Top Controls)

At the top of the dashboard, the admin can filter exams using:

- Programme
- Semester
- Exam type
- Academic year

This helps the examination cell quickly locate specific exams without searching manually.

After selecting filters, click **Apply** to display only relevant exams.



📘 TEACHER MANAGEMENT

🔹 3. Teachers List Panel

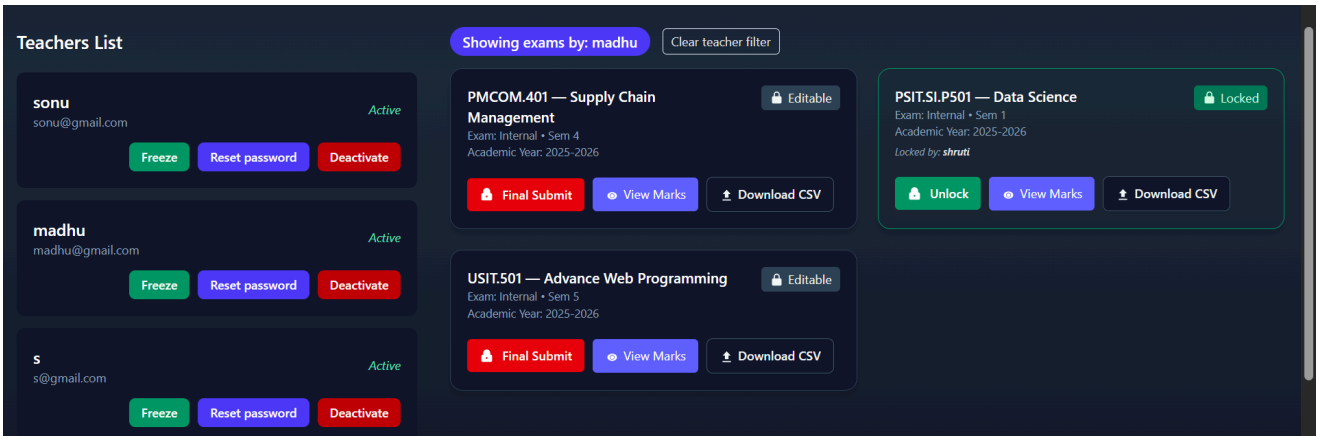
This panel displays all registered teachers.

Admins can:

- View teacher accounts
- Filter exams created by a specific teacher

- Control teacher access

Clicking a teacher shows only exams created by that teacher.



🔸 Teacher Control Buttons

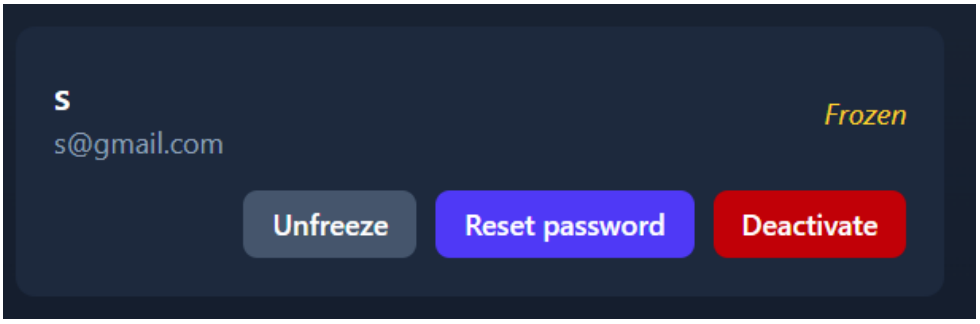
🟢 Freeze

Freezing temporarily stops a teacher from editing exams.

After freezing:

- Teachers cannot create or modify exams
- Teachers cannot enter marks
- Teachers can still log in
- Teachers can still download Excel reports

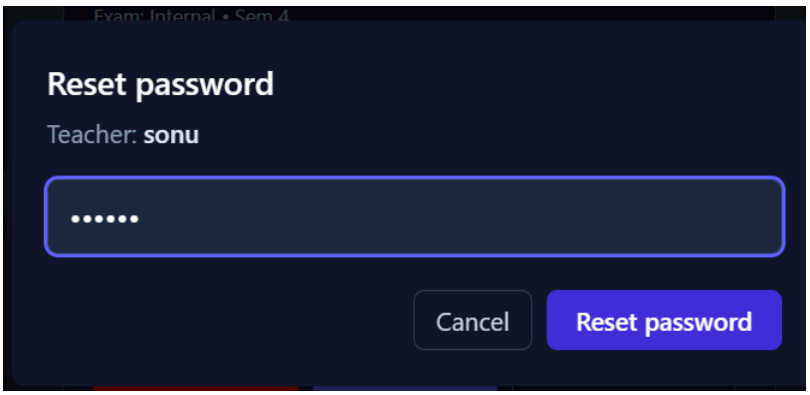
This is useful after evaluation completion or during administrative review.

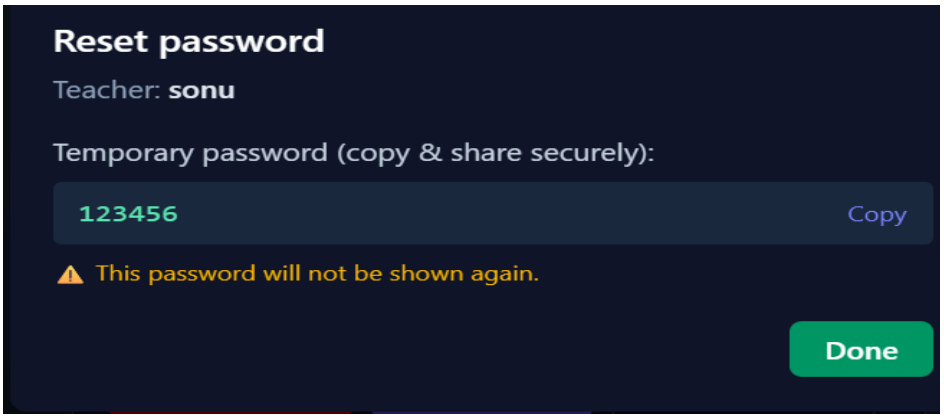


🔵 Reset Password

Reset Password allows the admin to generate new login credentials for teachers.

This ensures teachers regain access securely if credentials are lost.

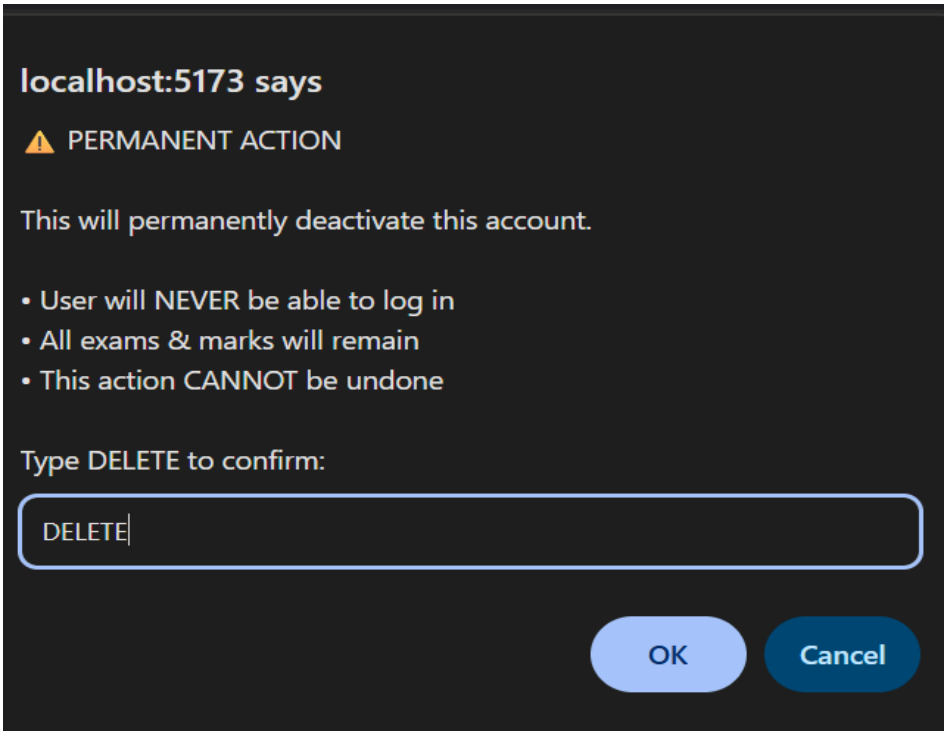




🔴 **Deactivate**

Deactivate removes system access without deleting the teacher's data or exams.

This is useful when staff leave or accounts must be disabled permanently.



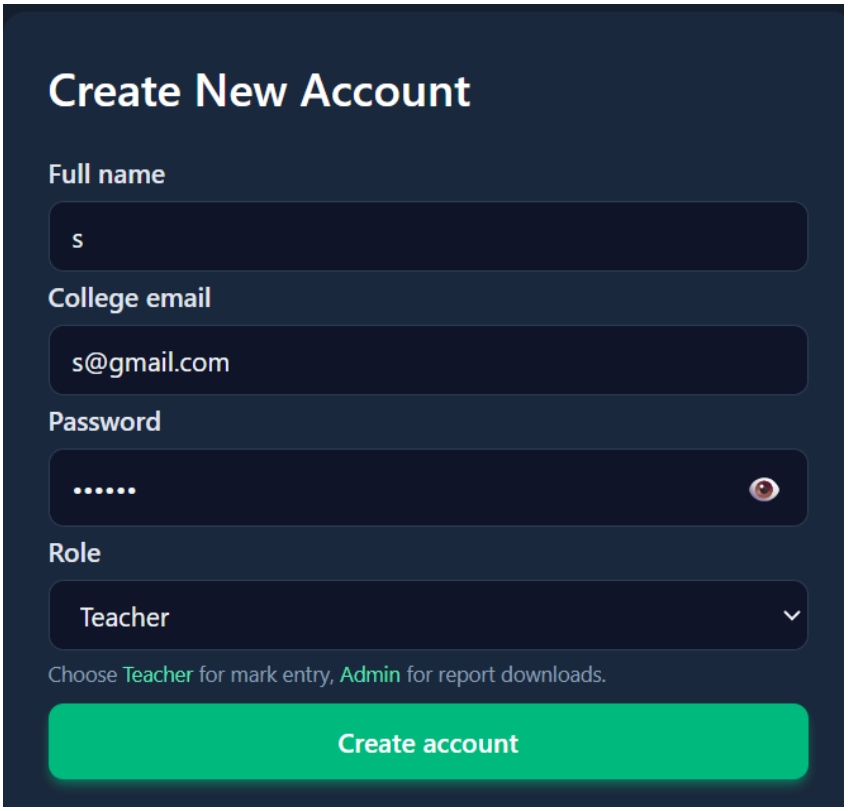
📘 USER MANAGEMENT

🔹 4. Create Teacher / Admin

Admins can create new teacher or admin accounts by entering:

- Name
- Email
- Password
- Role

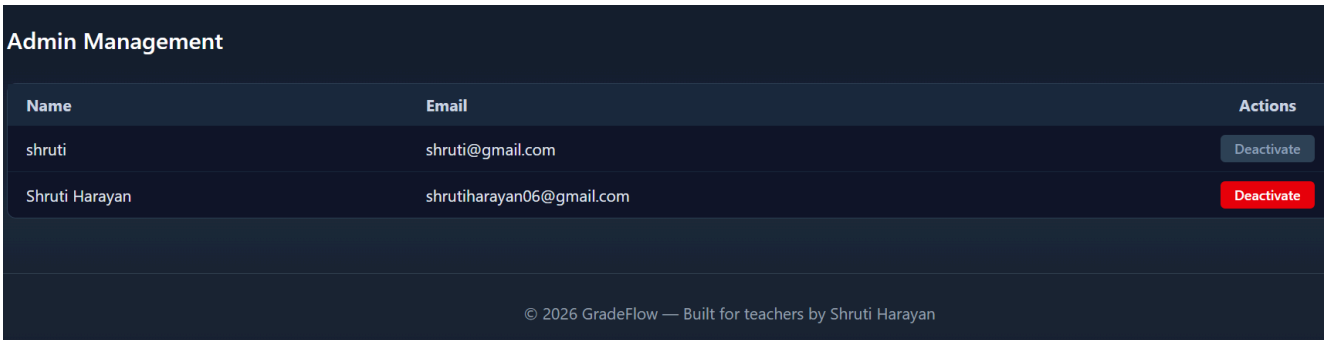
This ensures centralized user creation and controlled system access.

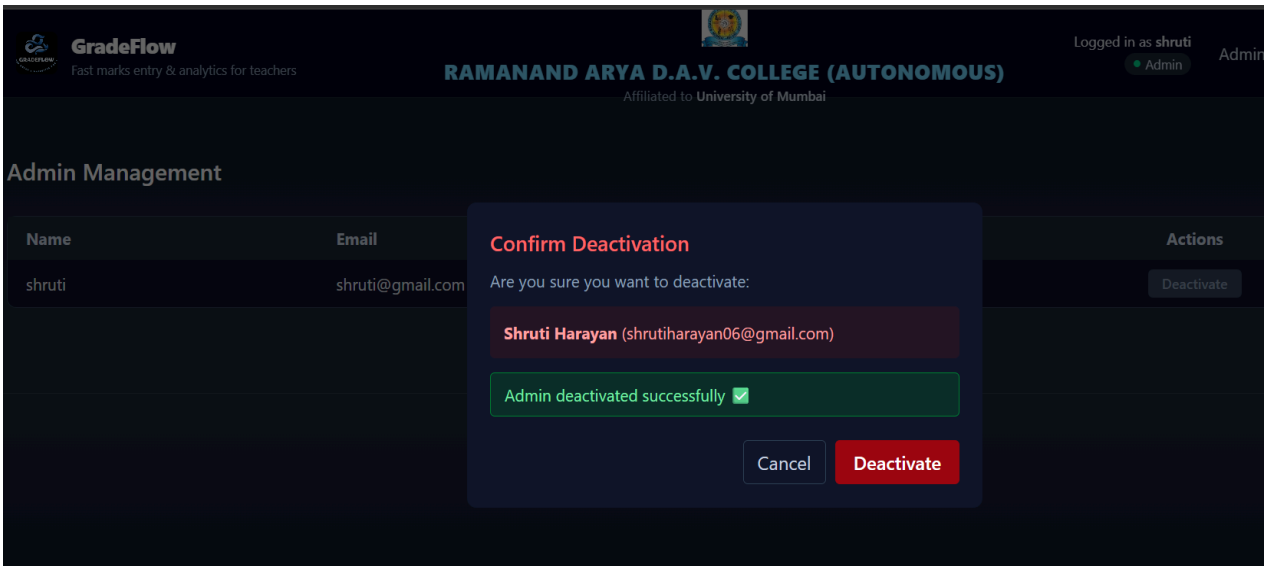


🔹 5. Manage Admins

This option allows the admin to view and control all administrator accounts.

An admin can deactivate other admin accounts if required, ensuring proper institutional control.



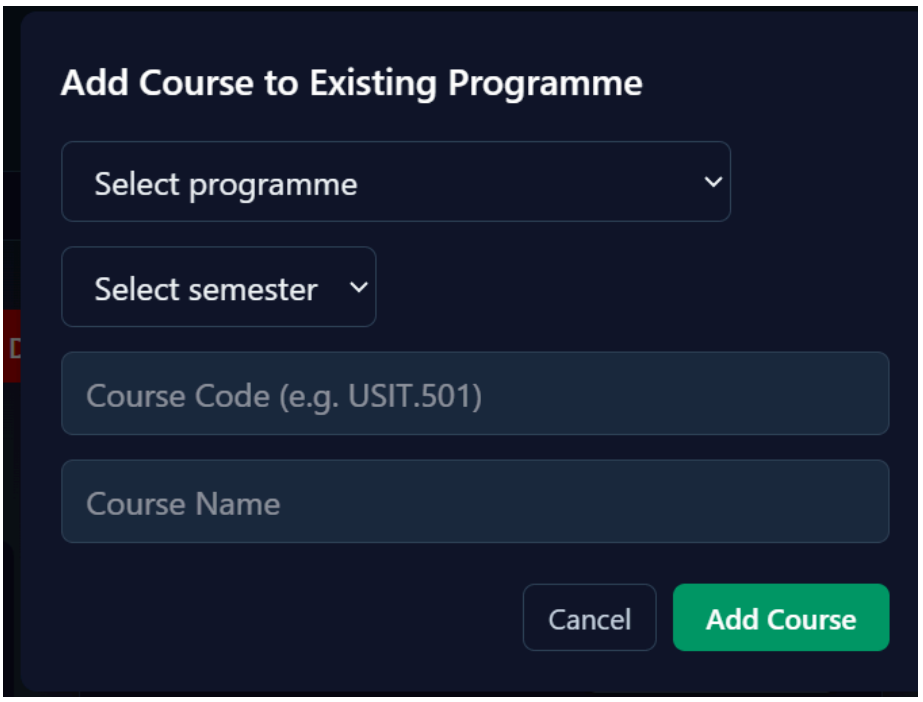


📘 ACADEMIC STRUCTURE MANAGEMENT

🔹 6. Add Course

Admins can add new courses to existing programmes and semesters.

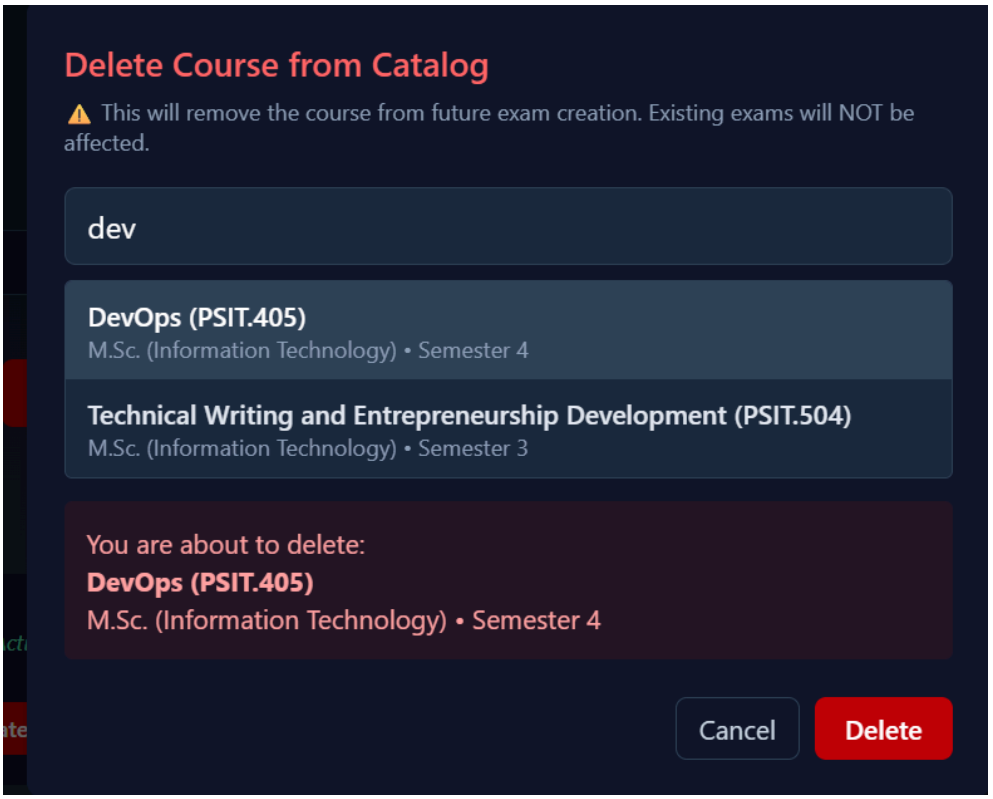
This keeps the academic structure updated without requiring system changes.



🔹 7. Delete Course

Courses can be removed from the catalog if discontinued.

This does **not affect past exam data**, ensuring historical records remain intact.

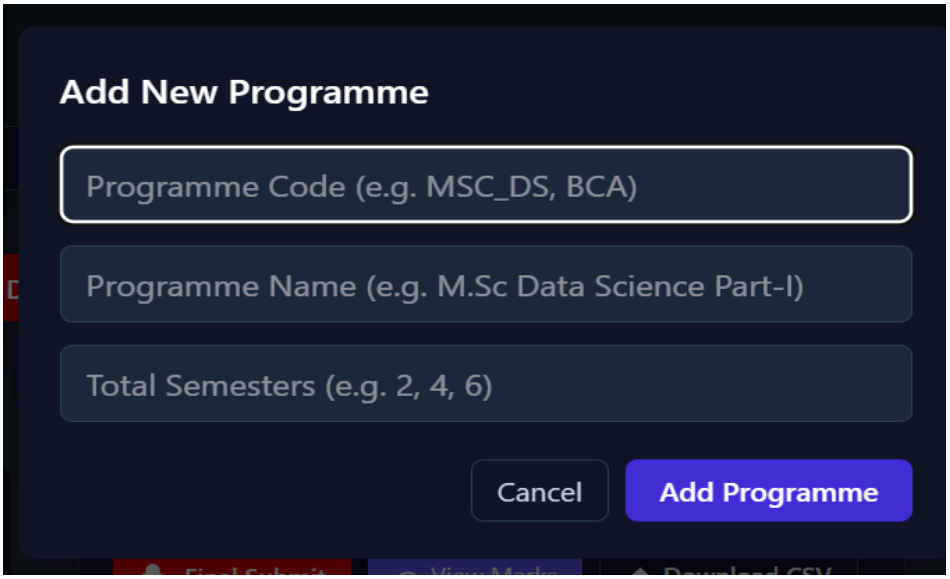


8. Add Programme

If a new academic programme is introduced, it can be added with:

- Programme code
- Programme name
- Number of semesters

This allows the system to adapt to institutional changes.

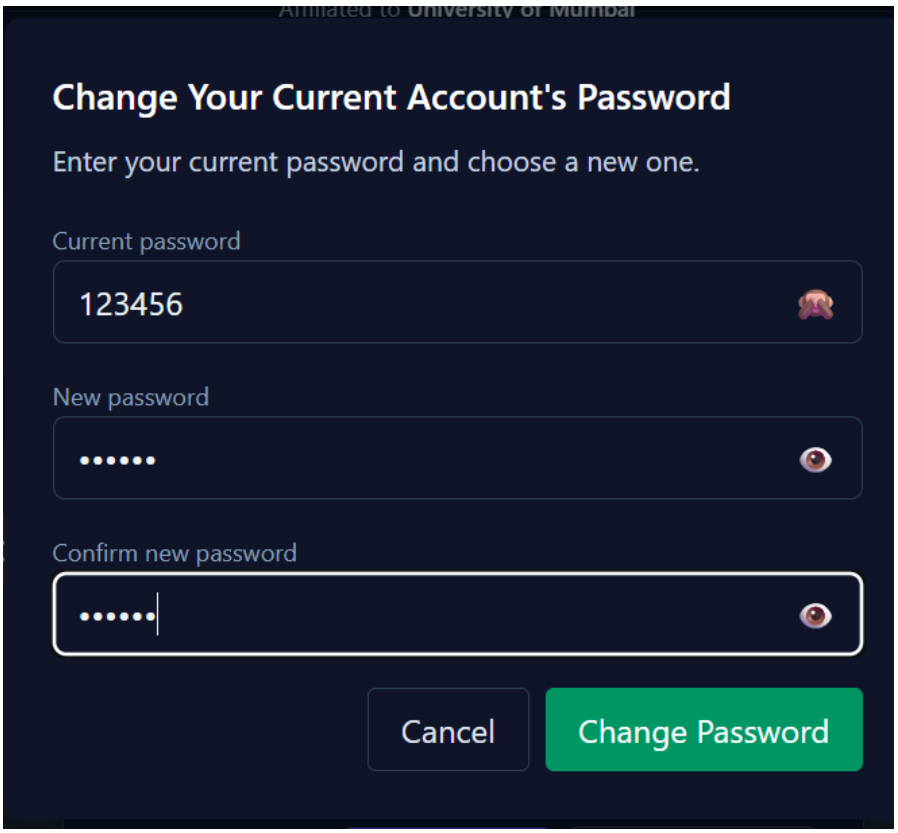


📘 ACCOUNT SECURITY

🔹 9. Change Password

Admins can securely change their password from within the system.

To do this, they must enter their **current password**, ensuring authorized changes only.



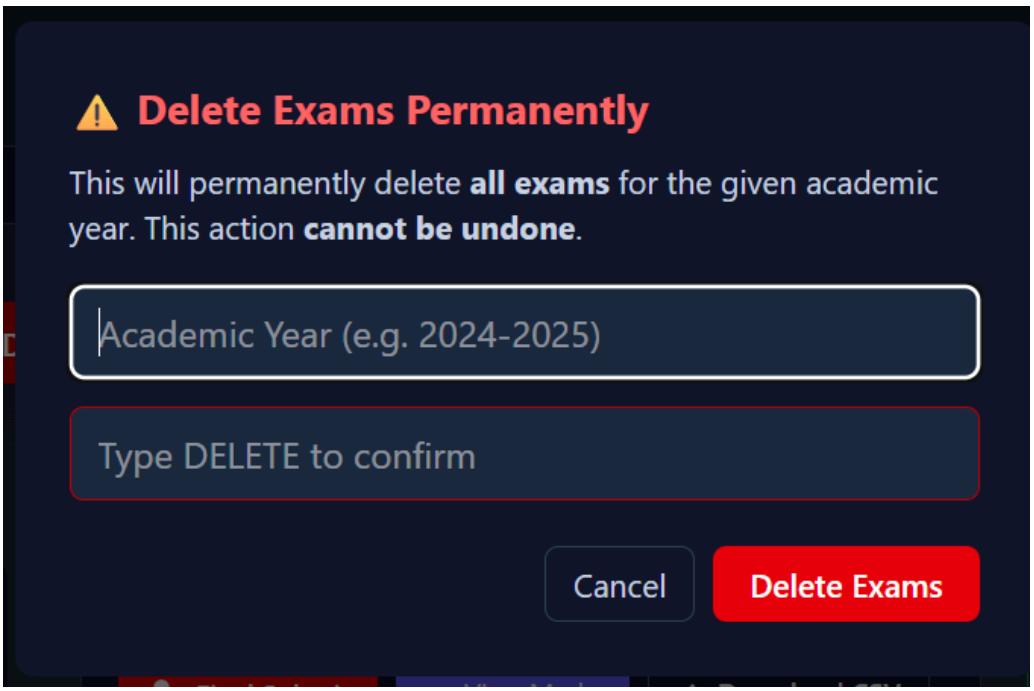
📘 BULK SYSTEM CONTROL

🔹 10. Delete All Exams (Controlled Action)

This option permanently deletes all exams for a specified academic year.

To prevent mistakes, the admin must type **DELETE** to confirm.

This ensures safe bulk cleanup after results are finalized.



📘 EXAM MANAGEMENT

🔹 11. Exam Cards Section

Each card represents one exam created by a teacher.

From here, the admin can control exam status and review data.

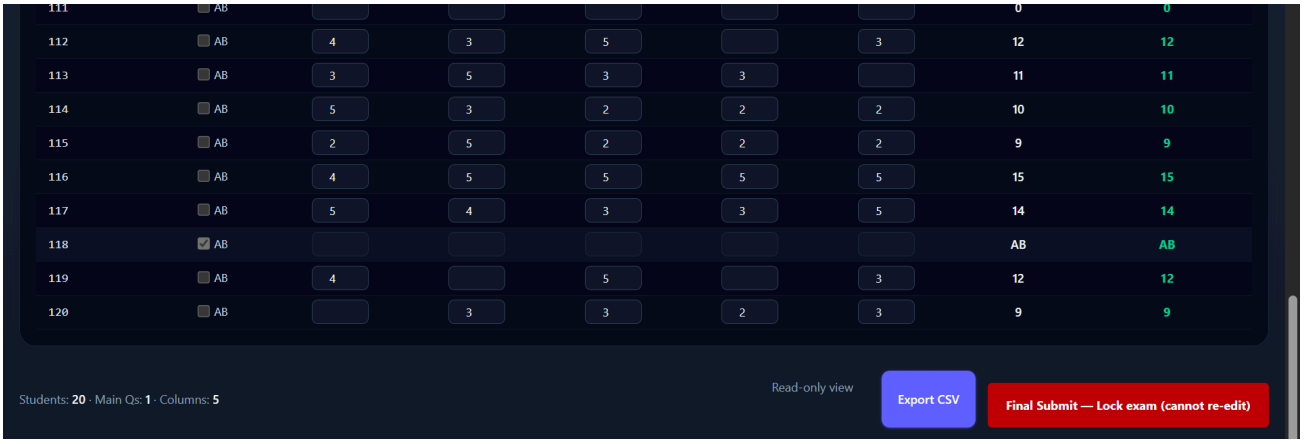
🔸 🔴 Final Submit / Lock Exam

The admin can finalize and lock an exam.
Once locked:

- Teachers cannot edit marks
- Teachers cannot add students
- The exam becomes read-only

If corrections are required, the admin can unlock the exam.

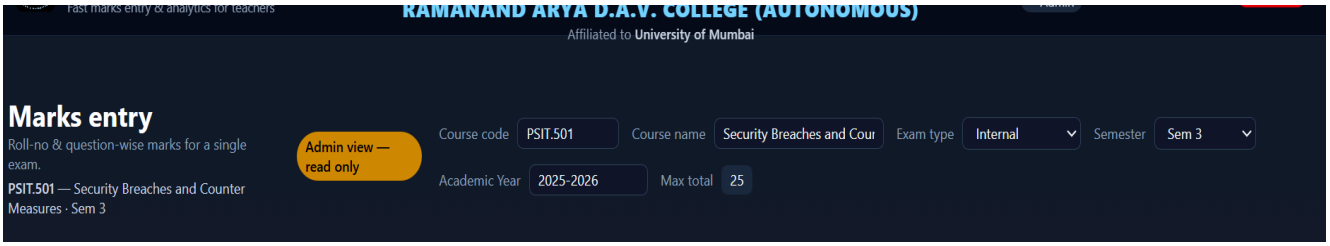
This ensures only the examination cell controls when marks can be changed.



🔸 🟣 View Marks

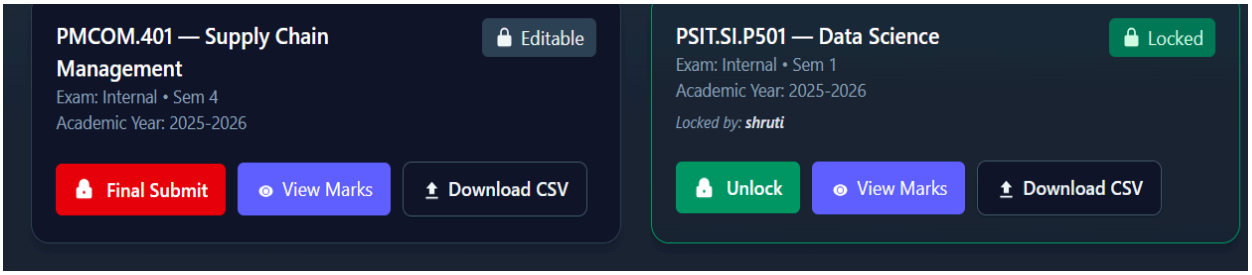
The admin can open the marks screen in **read-only mode** to review entries.

This allows verification without risking accidental changes.



🔸 ⚫ Download CSV

Admins can download the final Excel/CSV report for result processing at any time.



📘 PASSWORD RECOVERY (ADMIN ONLY)

🔹 12. Forgot Password Feature

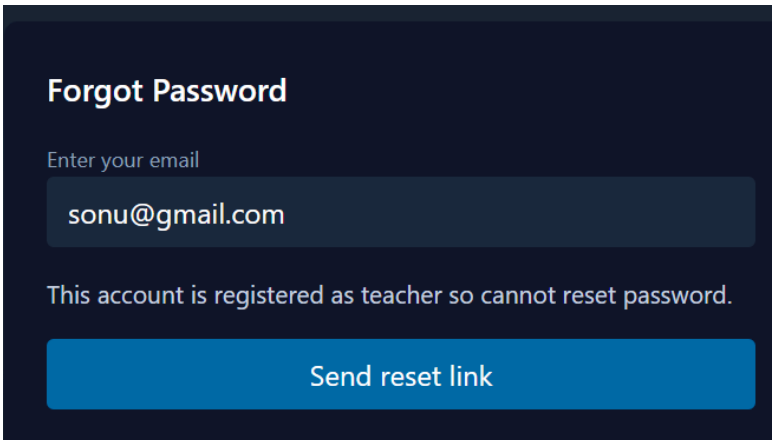
This option works **only for Admin accounts**.

🔸 Teacher Case

If a teacher email is entered, the system shows:

> "This account is registered as teacher so cannot reset password."

This ensures only authorized admin accounts can use password recovery.



🔸 Admin Password Reset Flow

1. Admin clicks **Forgot Password** on login page
2. Admin enters registered email
3. System sends reset instructions to email
4. Admin receives email with reset link and button
5. Link contains a secure token and expires after one use
6. Admin enters new password and confirms
7. Old password becomes invalid

This ensures secure self-recovery without administrative intervention.

Combined Marks View

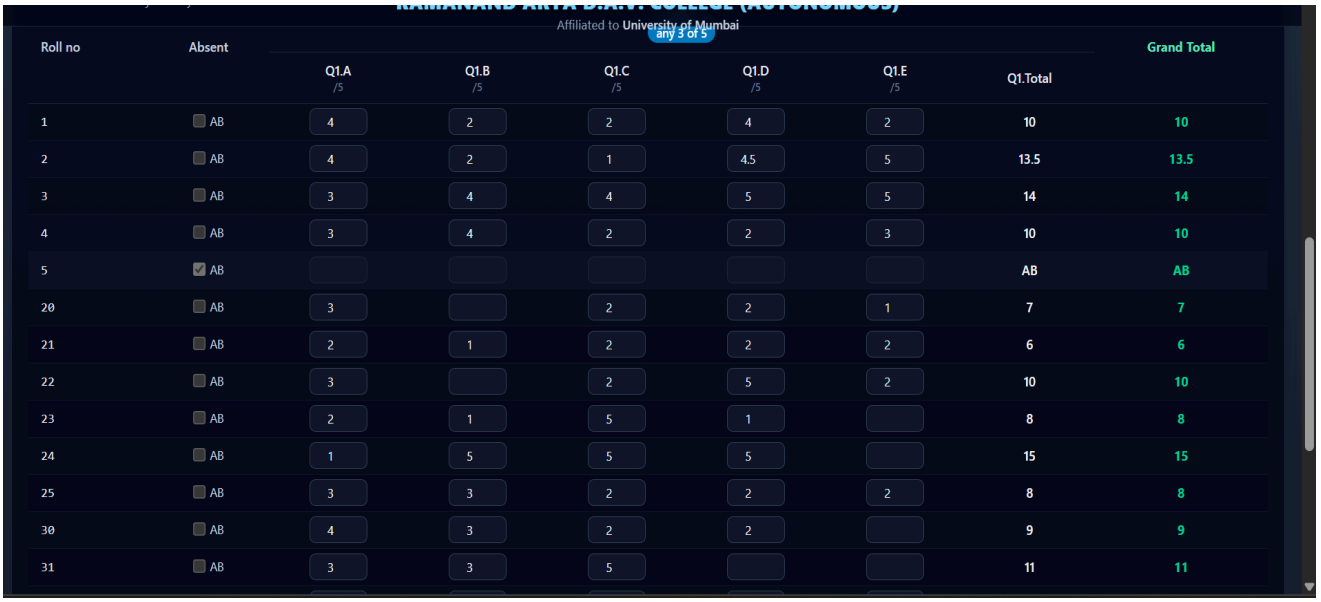
GradeFlow provides a **Combined Marks View** for subjects that are handled by multiple teachers across different divisions.

When the same subject, programme, semester, exam type, and academic year are shared but assigned to different teachers for separate divisions (for example, Division A and Division B), the system automatically consolidates the marks from all divisions.

This allows the administrator to:

- View marks for the entire class in one place
- Download a single unified report for result processing
- Maintain division-wise responsibility for mark entry while ensuring centralized result access

The feature helps the examination cell avoid manual merging of files and ensures consistency across divisions.



Roll no	Absent	Q1.A /5	Q1.B /5	Q1.C /5	Q1.D /5	Q1.E /5	Q1.Total	Grand Total
1	AB	4	2	2	4	2	10	10
2	AB	4	2	1	4.5	5	13.5	13.5
3	AB	3	4	4	5	5	14	14
4	AB	3	4	2	2	3	10	10
5	AB						AB	AB
20	AB	3		2	2	1	7	7
21	AB	2	1	2	2	2	6	6
22	AB	3		2	5	2	10	10
23	AB	2	1	5	1		8	8
24	AB	1	5	5	5		15	15
25	AB	3	3	2	2	2	8	8
30	AB	4	3	2	2		9	9
31	AB	3	3	5			11	11

Exam Summary and Marks Calculation Panel

The Summary panel displays an overview of the exam structure and total marks calculation.

It shows:

Students – total number of students added for the exam

Main Questions – number of main questions created

Sub Columns – total number of sub-question fields for marks entry

On the right side:

Computed Grand Max – the total marks automatically calculated based on all questions and sub-questions

Max Total (optional) – allows the teacher to manually enter the official paper total if needed

Displayed Grand Max – the final total that will appear in reports and exported Excel files

This panel helps admin verify the exam structure and marks total.
